Education

PES Modern College of Engineering

B.E in Computer Engineering

CGPA: 7.92

Feb. 2021 - Jun 2024

Pune, MH

Experience

AirMenus

Oct 2022 - Present

Frontend Engineering Intern

Pune, MH

- Built 15+ dynamic web applications using React and Next.js, resulting in a 15% increase in user engagement. Collaborated closely with the design team to implement pixel-perfect UI/UX designs, consistently delivering projects on-time.
- Developed and maintained responsive web applications for clients in the food and hospitality industry, enhancing their online presence and customer engagement. Implemented Tailwind CSS to streamline the development process, reducing CSS codebase by 20%.
- Collaborated with clients to gather project requirements and translate them into actionable technical tasks, ensuring client expectations were met or exceeded.

Yellow Fryum

Mar 2022 - May 2022

Frontend Developer & Research Intern

Pune, MH

- Spearheaded the design and development of a responsive landing page using ReactJS and Tailwind CSS, resulting in a 40% increase in page load speed.
- Worked closely with a cross-functional team of 5 interns to ideate and implement UI/UX improvements, resulting in a 20% boost in user engagement and a 15% increase in conversion rates.
- Conducted user research and usability testing, gathering feedback from over 100+ users, which directly influenced design decisions and led to a 30% improvement in user satisfaction scores.
- Met project deadlines consistently, delivering good-quality code and designs on time.

Projects

Instant AI | Link

July 2023

- Developed a responsive and intuitive landing page with dashboard using Next.js 13 & TypeScript, ensuring a seamless user experience across devices. Leveraged Tailwind CSS to streamline and accelerate the frontend development process.
- Integrated Prisma as the database ORM to manage and query data efficiently, ensuring data consistency and security.
- Implemented secure payment processing using Stripe, enabling users to seamlessly subscribe and manage their accounts.

shopTronics - eCommerce | Link

April 2023

- Employed ReactJS for building the dynamic user interfaces, Redux for efficient state management, Node.js for the backend server, and MongoDB as the database for seamless data storage and retrieval.
- Designed and implemented an intuitive customer panel with features like product browsing, search, user registration and authentication, shopping cart functionality, and secure payment processing using Stripe.
- Created a robust admin panel to manage products, orders, and customer data. Features included inventory management, user management, and reporting tools to monitor sales and inventory levels.

Technical Skills

Languages: C++, Python

Developer Tools: VS Code, Postman, Google Cloud Platform, GitHub

Technologies/Frameworks: ReactJS, NodeJS, Tailwind CSS, Jest

Databases: MySQL, MongoDB

Leadership / Extracurricular

Google Cloud Ready Facilitator

Spring 2020 – Present

President

University Name

- Selected as Google Cloud Facilitator for my institution.
- Enrolled and trained 600+ students in the program under the domains of Cloud Infrastructure, Big Data, Machine Learning & AI.
- The institution as a whole achieved Milestone 3 out of 4 which is a big feat with its first year in the GCRF program.
