EDUCATION

PES Modern College of Engineering
Bachelors Computer Engineering
CGPA: 7.5

Pune, MH
Feb 2021 - June 2024

EXPERIENCE

AirMenus | Frontend Developer Intern

Pune, MH | Oct 2022 - Present

Utilized HTML, CSS, JavaScript & React to develop and maintain responsive websites for clients ensuring optimal user experience and functionality.

Interacted directly with clients and translated their needs into actionable development tasks to deliver satisfactory results.

Adapted quickly to changing project requirements, timelines, and priorities within a fast-paced startup environment.

Yellow Fryum | Frontend Developer & Research Intern

Remote | Mar 2022 - May 2022

Utilized various online research tools and databases to gather relevant information on potential clients in the digital marketing sector.

Actively contributed to the development of website, resulting in a significant increase in client inquiries.

Conducted outreach activities, such as cold calling and email campaigns, to establish initial contact with potential clients and generate interest in our services.

SKILLS

Programming Languages: C++, Python
Libraries/Frameworks: ReactJS, NodeJS, Tailwind CSS
Tools / Platforms: Postman, Render, VS Code
Databases: MongoDB, MySQL

PROJECTS / OPEN-SOURCE

GitHub User Search | Link

JavaScript, CSS, HTML

Utilized frontend technologies to build user-friendly and intuitive application that lets user search GitHub profiles and view relevant information.

Enables interactivity and dynamic functionality, such as fetching data from the GitHub API and updating the UI in real-time.

Country REST API | Link

ReactJS, REST API, HTML, CSS

The Country REST API project is a web application built using React that leverages a RESTful API to provide comprehensive information about different countries around the world.

The app allows users to search for a specific country, view detailed data, and explore various aspects of each country, including demographics, geography, economy, and more.
